

DNZ PANEL FENCE
**PRESENTS SECURITY AND AESTHETICS
ALL IN ONE**

www.dnzonstruction.com

6"x12" GALVANIZED CHAIN LINK FENCE

Our difference with other products in market is that our product is hot dip galvanized (all components are first welded then whole panel is immersed in galvanizing bath) which results thicker zinc coating (min 80 microns galvanize thickness).

However most products in market are pre-galvanized (components are first galvanized then welded to form the panel) which results in thinner coating and prone to rust.

SPECIFICATIONS BASE TYPES
